

VBFormResize Overview

Softgroup VB Form Resize ActiveX 7

Softgroup VB Form Resize is a fast, small and lightweight ActiveX component that gives your applications resolution independence.

Softgroup VB Form Resize automatically resize all controls and fonts contained in a VB Form as they are sized.

To use Softgroup VB Form Resize simply add VB Form Resize to the Toolbox window of Microsoft Visual Basic and drag it to your form.

With Softgroup VB Form Resize you can

- Gives your applications resolution independence.
- Keep your controls font/size proportion whenever your forms are resized
- Can be easily implemented to already designed forms with no code
- Support controls nested inside others
- Supports MDI resize of MDIChild forms.
- Resizes fonts as well as the controls themselves
- Ability to specify whether the fonts of the controls will be resized or not.
- Fast, small and accurate resize engine.
